Alex Example

Engineering lead · Frontend platforms

Exampletown, UK · alex@example.com · 07700 900123 · alex.example.com

PROFILE

Hard-working engineer with experience in many areas of software, looking for a new challenge. I have worked in a range of companies, from small teams to large organisations, and I enjoy solving problems and learning new technologies. I am a team player who also works well on my own, and I am always keen to take on more responsibility.

EXPERIENCE

Engineering lead — Mar 2019 – now

Acme Ltd · Exampletown · Online retail, 400 staff

Lead the frontend platform team, which builds the shared tools behind Acme's website and apps. Report to the Head of Engineering and set the frontend roadmap with the product directors.

- Responsible for a design system used by 4 teams across 3 apps
- Cut build times by half by moving CI to a new system
- Mentored 5 developers, 2 of whom were promoted
- Ran the hiring loop for frontend roles, making 9 hires in two years
- Introduced accessibility reviews, bringing the main apps to WCAG 2.2 AA

Senior engineer — Jun 2015 – Feb 2019

Globex Corporation · Exampletown · Travel booking

Joined as one of the first frontend engineers on the booking site, then took on the checkout and the services around it as the company grew from 60 to 300 people.

- Worked on the checkout
- Led the move to a shared component library
- Built the price alerts service, used by 1.2 million customers
- Moved the front end from jQuery to React, page by page, without a freeze

Software engineer — Sep 2012 – May 2015

Initech · Sampleford · Business software

Developer on Initech Finance, a reporting tool for mid-sized firms, in a team of eight working in two-week sprints.

- Built reporting dashboards for the finance product
- Wrote the first automated browser tests, catching regressions before release
- Supported customers on the help desk rota, one week in six

Graduate developer — Sep 2011 – Aug 2012

Initech · Sampleford

A one-year graduate scheme with three placements.

- Rotated through the web, data and support teams

SKILLS

Languages	TypeScript, JavaScript, HTML, CSS, SQL
Frameworks	React, Next.js, Node.js, Storybook, Playwright
Practices	Design systems, accessibility, CI/CD, performance, code review
Leadership	Mentoring, hiring, roadmaps, running retrospectives

EDUCATION

BSc Computing, Example University · First class — 2008 – 2011

CERTIFICATIONS

Certified Accessibility Specialist, Example Accessibility Board — 2021
